

SERGE

2 + 2 MIXER: 2 independent DC coupled mixers, each with 2 input channels. CV and audio welcome. **MIX** output provides the sum of all 4 channels.

Color Scheme

white: DC coupled, CV or audio

black: AC coupled

Size: 18HP
 skiff-friendly
 (< 26mm deep)
 Power:
 55mA @ +12V
 50mA @ -12V

DUAL VCA: the audiophile and distortion-happy VCA taken from the Stereo Mixer. It has a special exponential response that imitates the behavior of the early Serge VCAs and allows massive amplification and overdrive.

Warning: the resulting signal can get very high amplitudes (up to 16Vpp) and allows squaring of a sine or triangle wave.
